PROJECTS

Spendy – Mobile Expense Management Platform Production APK

Jan 2026 – Apr 2026
Flutter, Firebase, Dart, Cloud Functions

- Architected a scalable cross-platform solution utilizing a serverless Firebase backend (Auth, Firestore, Cloud Functions) to support real-time user collaboration and instant push notifications.
- Optimized the user payment funnel by embedding UPI deep-links, eliminating manual data entry by pre-filling exact payment amounts and IDs for frictionless settlements.

Recipe Finder Website Natural Language Processing

June 2025
React.js, Tailwind CSS, JavaScript, Edamam API, Vercel

- Responsive recipe search app using Edamam API.
- Implemented Gemini API to integrate recipes of dishes.

AI Video Generator Natural Language Processing

Sept 2024- Dec 2024
Python, OpenAI GPT, Text-to-Speech (TTS), Video Editing API

- AI-powered video generator from text and presentations.
- Generated videos using Open AI GPT from texts and images.
